

# Desert Pea

Floral emblem of South Australia

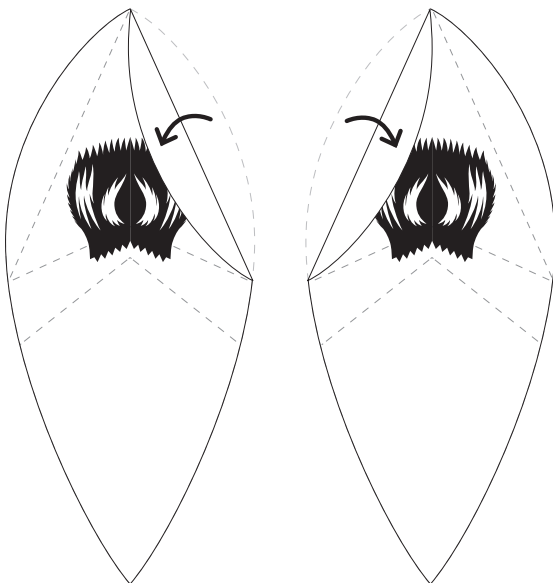

1 After colouring in your desert pea, fold in half.

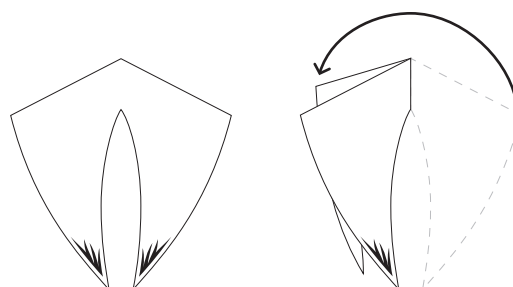

2 Fold along the two dashed lines in both directions.

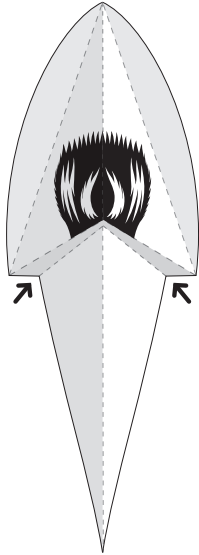

3 Unfold and then fold the top curves in along the dashed lines on both sides.

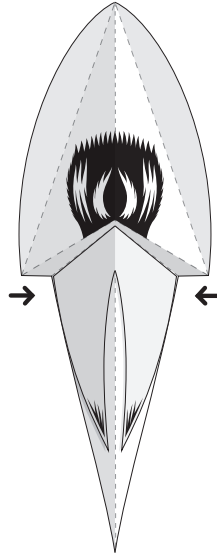

4 Fold top petal section in half and unfold.

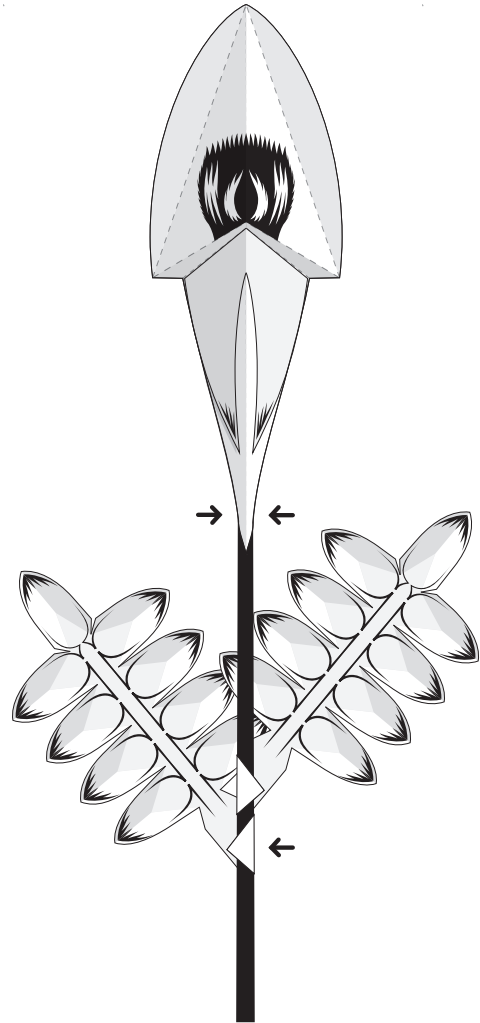

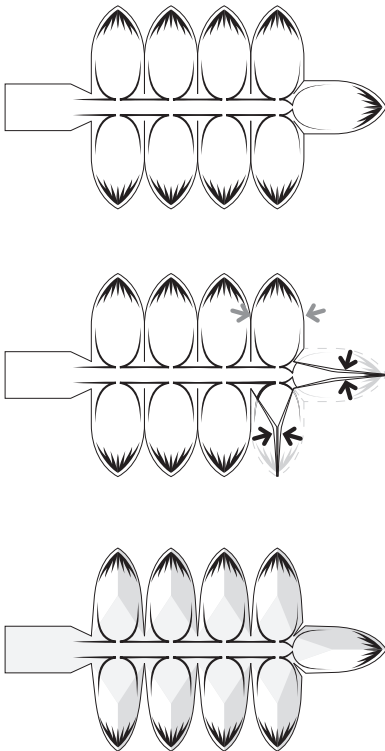

**5** Crush fold the top of the flower over the bottom of the flower and open out. It will look like a concertina fold.

**6** Tape or glue the top petal section onto the main flower body.

**7** Colour the leaves then pinch each of the leaves in. Once they have all been pinched they will be slightly open like the real leaves.

**8** Tape the final flower and leaves together onto a pencil, chop stick or twig.
